

Routine schedule:
12 months: Men-C-C
Grade 7: Men-C-ACYW135

All meningococcal vaccines are administered intramuscularly.

Available meningococcal vaccines:
Men-C-C: Menjugate & NeisVac-C
Men-C-ACYW135: Menactra & Nimenrix

Men-C-ACYW135 prior to grade 7:
Only 1 dose of Men-C-ACYW135 is required for school if it was given after 12 months of age and minimum intervals have been met.

Minimum intervals:
4 weeks between meningitis-containing vaccines

If a child received Men-C-ACYW135 in infancy or childhood, the grade 7 dose is still recommended.

A dose of Men-C-C is valid for school if:

- 1) **Given after the 1st birthday**
 - NOTE: babies may get Men-C-C prior to the 1st birthday (depending on the province), but these are not valid under school requirements
- 2) **Given at least 4 weeks after another meningococcal vaccine**
